

Welcome To SalesMarketer

SalesMarketer is a fully customizable application that empowers you and the way you handle your day-to-day business. We developed the SalesMarketer App from listening to the needs of business owners and sales management.

This guide will help you get started.

Slide – similar to how you use other presentation applications, a slide is a document. SalesMarketer supports importing & presenting a variety of popular document formats, such as Adobe PDF, JPEG or PNG images, Microsoft Word / Excel / PowerPoint documents, and so forth.

Slide Deck – A collection of slides is a slide deck. Slides can belong to a single deck or to multiple decks. Even decks can belong to other decks. Decks are shown on the main SalesMarketer views and organize your documents for easy access.

Carousel – The main views of SalesMarketer are the carousels. They allow quickly scrolling through slides and slide decks to access your documents quickly and efficiently.

Breadcrumb – The red text + chevron at the top left corner of the screen. It marks your last location.

Star – The star button adds the current slide or deck to the Favorites list

Navigating

To go back to the carousel, either tap the breadcrumb or slide your finger from the left edge of the screen. To go to the next slide, swipe from right to left inside the screen. You can also flip back to the previous slide by swiping from left to right inside the screen. To go directly back to the top-level carousel, you can also tap the “Home” or “Presentations” buttons at the bottom of the App.
